ClassComfort: PDF · Figma | **Smart Mirror:** PDF · Figma

PROFILE

UI/UX designer and Computer Science master's student (TU Clausthal) who can take a product from user research to hi-fi screens in Figma and also build it in React. Experienced in surveys, interviews, personas, user flows, information architecture and usability heuristics, with a focus on accessibility. Looking for a Werkstudent role in UI/UX design in an English- or German-speaking team (German A1, learning), remote or hybrid.

DESIGN PROJECTS

ClassComfort: Classroom Finder App · UX/UI case study (2025) Case study (PDF) Figma file

- **Research:** 15-question survey (20 students and faculty) and 5 faculty interviews; 60% struggle to find rooms with working facilities, 80% say a finder app would save them time.
- **Define:** 2 personas, empathy map, competitor analysis (3 tools, 6 features), SWOT and 10 design decisions.
- **Design:** user flow, site map, information architecture, sketches and 7 high-fidelity screens (search, room details, booking, confirmation, profile, notifications, issue report).
- **Evaluate:** Persona-based heuristic evaluation of the 7 screens (5 personas, 31 findings merged into 6 priority fixes); usability test with 5 students planned.

Tools: Figma, FigJam

Smart Mirror UI: Accessibility Redesign · UX/UI case study (2026) Case study (PDF) Figma file

- **Research:** audited the existing interface and found clutter, small text, low contrast and weak information hierarchy; defined 3 user groups (busy professionals, accessibility-focused users, smart-home users).
- **Design:** design principles, 5-step user flow, Nielsen's usability heuristics and 5 screens (home, fitness, profile, weather, music) with a 50+ component set.

Tools: Figma

SKILLS

UX & UI design: user research (surveys, interviews), personas, empathy maps, user flows, information architecture, wireframing, hi-fi UI design, usability heuristics, accessibility, competitor analysis
Tools: Figma, FigJam · **Front-end:** HTML/CSS, JavaScript, TypeScript, React, Next.js · **Other:** Python, Java, SQL, Git/GitHub

EDUCATION

M.Sc. Computer Science (Informatik), *TU Clausthal* WS 2026/27 – Current
Current modules: Requirements Engineering (elicitation, use cases, scenarios), Forschungsmethoden (research methods)

B.Tech Computer Science and Engineering, *Lovely Professional University* 07/2023 – 05/2026
CGPA 8.02/10 (German grade 2.1) · Coursework: UI/UX Design, Web Technologies, Software Engineering, Artificial Intelligence

Diploma in Electrical and Electronics Engineering, *E.S.C Government Polytechnic, Nandyal* · 84.99% 07/2020 – 05/2023

DEVELOPMENT & RESEARCH

Rapid-Gigs, AI-based gig platform · React (Vite), Node.js, MongoDB, Python, Java Spring Boot · github.com/Kiranpjk/RapidGigs 05/2025 – 04/2026
Full-stack platform with AI recommendations and a simulated milestone-payment service; built responsive React front-end.

NextHood, accommodation finder · Next.js, React, Firebase, Genkit AI · github.com/Kiranpjk/nexthood 02/2025 – 04/2025
Location-based search with Google Sign-In and a responsive UI.

Research presenter, ICICST 2026, NIT Jalandhar: *RapidGig: A Hybrid Web2–Web3 Gig Platform with AI-Based Video Verification and Milestone-Driven Payments* 2026

Open Source Contributor · Fixed React bugs, improved UI components and usability, took part in pull requests and code reviews. 08/2025 – Current
